## PROJECTS

---

### RK Studio

Technologies Used: Nodejs, ExpressJs, MongoDB

- Developed a full-fledged e-commerce platform enabling users to browse and purchase clothing items.
- Designed and implemented RESTful APIs for both the admin and user panels, supporting core functionalities like product management, order processing, and user authentication.
- Built the project from the ground up, including database design, backend architecture, and integration of secure payment processing.

### Barn Connect

Technologies Used: Node.js, Express.js, MongoDB

- Developed RESTful APIs for barn booking and management, enabling seamless horse barn reservations.
- Integrated payment gateways (e.g., Stripe) for secure and automated barn rental payments.
- Implemented role-based access control for admin and user functionalities using JWT authentication
- Optimized backend architecture to handle high-volume transactions with low latency.
